CONTENTS

RESEARCH PAPERS

Sediment Trend Analysis (STA®): Kinematic vs. Dynamic Modeling ................................................................. Patrick McLaren 429
A Sediment Trend Analysis (STA®) in Support of Dredged Material Management in Lyttelton Harbour, Christchurch, New Zealand ......................................................................................................................... Patrick McLaren and Gary Teear 438
Patterns of Alien Plant Invasion across Coastal Bay Areas in Southern China .......................................................... Hai Ren, Qinfeng Guo, Hong Liu, Jing Li, Qianmei Zhang, Hualin Xu, and Fanghong Xu 448
Ice Thrusting and Hummocking on the Shores of the Southern Baltic Sea’s Coastal Lagoons ................................. Józef P. Giritjatowicz 456
Evidence for Changes in Paleoenvironments along the Lower Cap-Rouge River, Quebec (Canada), in Relation to a High Water Stand during the Mid-Holocene Laurentian Transgression ............................................................................................. Jean-François Verville, Louise Filion, and Patrick Lajeunesse 465
High Water Mark Determination Based on the Principle of Spatial Continuity of the Swash Probability .............................. Xin Liu, Jianhong (Cecilia) Xia, Chris Blenkinsopp, Lesley Arnold, and Graeme Wright 487
Effects of the Discharge of Iron Ore Tailings on Subtidal Rocky-Bottom Communities in Northern Chile .............. Sergio A. González, Wolfgang Stolz, and Domingo Lancellotti 500
Understanding Space–Time Patterns of Long-Term Tidal Fluctuation over the Pearl River Delta, South China ........... Jinhai Zheng, Wei Zhang, Peng Zhang, and Yuliang Zhu 515

Simulation of Flow within Armour Blocks in a Breakwater ....................................................................................... Fabio Dentale, Giovanna Donnarumma, and Eugenio Pugliese Carratelli 528
Quantitative Estimation of Longshore Sediment Transport Based on Thermoluminescence: Two Case Studies around Tenryu and Nile River Mouths ......................................................................................... Mostafa T.T. Ahmed, Shinji Sato, and Yoshimitsu Tajima 537

Mapping and Portraying Inundation Uncertainty of Bathtub-Type Models ................................................................. Keil Schmid, Brian Hadley, and Kirk Waters 548

A Frequency Domain Approach for Predicting the Signal Strength of Tsunamis at Coastal Tide Gauges ................... L.C. Breaker, T.S. Murty, and D. Carroll 562

Stratigraphic Architecture of a Regressive Strand Plain, Flinders Beach, North Stradbroke Island, Queensland, Australia ................................................................................................................................. Allen M. Gontz, Patrick T. Moss, and Ekatherina K. Wagenknecht 575
Numerical Assessment of the Impacts of Potential Future Sea-Level Rise on Hydrodynamics of the Yangtze River Estuary, China ................................................................................................................ Cuiping Kuang, Wei Chen, Jie Gu, David Z. Zhu, Lulu He, and Hongcheng Huang 586

Effects of Submerged Breakwater on Hydrodynamics and Shoreline Change of the East Beach of Beidaihe, Bohai Bay, China ................................................................................................................ Cuiping Kuang, Lulu He, Jie Gu, Yi Pan, Yu Zhang, Yanxiong Yang, Ruofeng Qiu, and Jiabo Zhang 598
Assessment of a Measure for Water Exchange Strengthening of Artificial Headland Bays Based on Shoreline Change and Flushing Time ......................................................................................... Yi Pan, Cuiping Kuang, Jie Gu, Lulu He, Yu Zhang, Yanxiong Yang, Ruofeng Qiu, and Jiabo Zhang 615

Plant Zonation in Restored, Nonrestored, and Preserved Spartina maritima Salt Marshes ........................................ G. Curado, A.E. Rubio-Casal, E. Figueroa, and J.M. Castillo 629

TECHNICAL COMMUNICATIONS

Modeling of Inundation Characteristics of a Microtidal Saltmarsh, Grand Bay National Estuarine Research Reserve, Mississippi ........................................................................................................................... Bradley Ennis, Mark S. Peterson, and Thomas P. Strange 635

DEPARTMENTS

CERF Board of Trustees ........................................................................................................................................ III
JCR Editorial Board Years of Service ....................................................................................................................... IV
