Sparse-based reconstruction of missing information in remote sensing images from spectral/temporal complementary information
X. Li, H. Shen, L. Zhang and H. Li .................................................. 1

Hyperspectral image classification using discontinuity adaptive class-relative nonlocal means and energy fusion strategy
M. Jia, M. Gong and L. Jiao .......................................................... 16

Scale parameter selection by spatial statistics for GeOBIA: Using mean-shift based multi-scale segmentation as an example
D. Ming, J. Li, J. Wang and M. Zhang ........................................ 28

Dimensionality reduction of hyperspectral images based on sparse discriminant manifold embedding
H. Huang, F. Luo, J. Liu and Y. Yang ....................................... 42

Accurate and robust registration of high-speed railway viaduct point clouds using closing conditions and external geometric constraints
Z. Ji, M. Song, H. Guan and Y. Yu ........................................... 55

Automatic registration of optical aerial imagery to a LiDAR point cloud for generation of city models
B.O. Abayowa, A. Yilmaz and R.C. Hardie .................................. 68

A comparison of four relative radiometric normalization (RRN) techniques for mosaicing H-res multi-temporal thermal infrared (TIR) flight-lines of a complex urban scene
M.M. Rahman, G.J. Hay, I. Coulignon, B. Hemachandran and J. Bailin ................. 82

Modeling aboveground tree woody biomass using national-scale allometric methods and airborne lidar
Q. Chen ................................................................. 95

Radiometric normalization and cloud detection of optical satellite images using invariant pixels
C.-H. Lin, B.-Y. Lin, K.-Y. Lai and Y.-C. Chen ................................ 107

Multi-dimensional SAR tomography for monitoring the deformation of newly built concrete buildings
P. Ma, H. Lin, H. Lan and F. Chen ............................................. 118

Full-waveform data for building roof step edge localization
M. Sloat ................................................................. 129

Improved capabilities of the Chinese high-resolution remote sensing satellite GF-1 for monitoring suspended particulate matter (SPM) in inland waters: Radiometric and spatial considerations
J. Li, X. Chen, L. Tian, J. Huang and L. Feng .................................. 145

Mapping paddy rice planting areas through time series analysis of MODIS land surface temperature and vegetation index data

Calibration of hyperspectral close-range pushbroom cameras for plant phenotyping

The U. V. Helava Award – Best Paper Volumes 87–98 (2014) ................................................................. 1
