ESTUARINE COASTAL AND SHELF SCIENCE

VOLUME 65  NUMBERS 1–2  OCTOBER 2005

CONTENTS

Research Papers

M. L. G. Soares, Y. Schaeffer-Novelli Above-ground biomass of mangrove species. I. Analysis of models................................. 1

R. de la Huz, M. Lastra, J. Junoy, C. Castellanos, J. M. Viéitez Biological impacts of oil pollution and cleaning in the intertidal zone of exposed sandy beaches: Preliminary study of the “Prestige” oil spill........................................ 19

B. Jesus, V. Brotas, M. Marani, D. M. Paterson Spatial dynamics of microphytobenthos determined by PAM fluorescence.......................................................... 30

A. Baeta, H. N. Cabral, J. M. Neto, J. C. Marques, M. A. Pardal Biology, population dynamics and secondary production of the green crab Carcinus maenas (L.) in a temperate estuary.............................................. 43

M. Horinouchi, Y. Nakamura, M. Sano Comparative analysis of visual censuses using different width strip-transsects for a fish assemblage in a seagrass bed........................................ 53

A. C. Gebhardt, F. Schoster, B. Gaye-Haake, B. Beeskow, V. Rachold, D. Unger, V. Ittékott The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic proxies. The turbidity maximum zone of the Yenisei River (Siberia) and its impact on organic and inorganic prox......

J. Gago, X. A. Álvarez-Salgado, M. Nieto-Cid, S. Brea, S. Piedracoba Continental inputs of C, N, P and Si species to the Ría de Vigo (NW Spain).............................................................................. 74

X. Lu, E. Matsumoto Recent sedimentation rates derived from 210Pb and 137Cs methods in Ise Bay, Japan...................................................................................................................... 83

M. Lunven, J. F. Guillaud, A. Youenou, M. P. Crassous, R. Berric, E. Le Gall, R. Kérouel, C. Labry, A. Aminot Nutrient and phytoplankton distribution in the Loire River plume (Bay of Biscay, France) resolved by a new Fine Scale Sampler.................................................................................. 94

M. A. Granskog, H. Kaartokallio, D. N. Thomas, H. Kuosa Influence of freshwater inflow on the inorganic nutrient and dissolved organic matter within coastal sea ice and underlying waters in the Gulf of Finland (Baltic Sea)......................................................................................... 109

P. M. S. Monteiro, A. N. Roychoudhury Spatial characteristics of sediment trace metals in an eastern boundary upwelling retention area (St. Helena Bay, South Africa): A hydrodynamic–biological pump hypothesis........................................................................................................... 123
