Contents

Anatomy:
Effect of calcification on cuticle density in decapods: a key to lifestyle
CRYSTAL G. AMATO, DAVID A. WAUGH, RODNEY M. FELDMANN, AND CARRIE E. SCHWEITZER .......................... 587

Behavior:
Behavioral correlates of alternate male forms (Form I and Form II) in the crayfish Orconectes rusticus
ANN JANE TIERNEY, CHARUNI GUNARATNE, KAITLIN JENNISON, VANESSA MONROY, AND LAUREN DONNELLY ........ 596
Asymmetry of leg size and differential leg usage in the sand fiddler crab, Uca pugilator
DENS0N KELLY MCLAIN AND ANN E. PRATT .................................................. 601

Ecology:
Reproductive biology of the southern rough shrimp Trachysalambria curvirostris (Penaeidae) in Kagoshima Bay, southern Japan
MD. YEAMIN HOSSAIN AND JUN OHTOMI .................................................. 607
Ecology of a population of Lissocragon stylrostris (Caridea: Crangonidae), with notes on the occurrence and biology of its parasite, Argoa pugettensis (Isopoda: Bopyridae)
JOSE R. MARIN JARRIN AND ALAN L. SHANKS ........................................... 613
Life history migrations of the amphidromous river shrimp Macrobrachium ohione from a continental large river system
RAYMOND T. BAUER AND JAMES DELAHOUSSAYE ........................................ 622
The invasive crayfish Orconectes limosus in Lake Varese: estimating abundance and population size structure in the context of habitat and methodological constraints
FRANCESCA PILOTTO, GARY FREE, GIUSEPPE CROSA, FABRIZIO SENA, MICHELA GHIANI, AND ANA CRISTINA CARDoso ................................................................. 633
Growth and reproduction of the portunid crab Charybdis bimaculata (Decapoda: Brachyura) in Tokyo Bay
WATARU DOI, MASASHI YOKOTA, CARLOS AUGUSTO STRUßSMANN, AND SEIICHI WATANABE ........................................ 641
Reproductive biology and functional maturity in females of Aegla franca (Decapoda: Anomura: Aeglidae)
SéRGO LUIZ DE SIQUEIRES BUENO AND ROBERTO MUNEHISA SHIMIZU ................................. 652
Male maturity, number of sperm, and spermatophore size relationships in the coconut crab Birgus latro on Hatoma Island, southern Japan
TAKU SATO, KENZO YOSEDA, OSAMU ABE, AND TAKURO SHIBUNO .......................... 663

Larvae and Development:
Life cycle of a bioluminescent marine ostracode, Vargula annecohenae (Myodocopida: Cypridinidae)
GRETCHEN A. GERRISH AND JAMES G. MORIN .................................................. 669
First zoeal stages of six species of Hemigrapsus (Decapoda: Brachyura: Grapsidae) from the northern Pacific including an identification key
SEOK HYUN LEE AND HYUN SOOK KO .......................................................... 675

Paleobiology:
Bicornisranina bocki, n. gen., n. sp. (Decapoda: Raninidae) from the Cretaceous of Vancouver Island, British Columbia, Canada
TORREY NYBORG AND JOHN FAM .............................................................. 686

Physiology:
Tolerance for ammonia in early stage spiny lobster (Jasus edwardsii) phyllosoma larvae
MICHEL BERMUDES AND ARTHUR J. RITAR .................................................. 695

Taxonomy:
Revision of the genus Murunducaris (Copepoda: Harpacticoida: Parastenocarididae), with descriptions of two new species from South America
PAULO HENRIQUE C. CORCISINHO, PEDRO MARTINEZ ARBIZU, AND JANET W. REID ................................. 700
Nippnbathynella also in South-Korea (Bathynellacea: Syncarida)
JOO-LAE CHO, IN-SEO HWANG, AND EUN-JEONG NAM ....................................... 721

Short Communication:
Analysis of Hsp70 in Litopenaeus vannamei and detection of SNPs
DIGANG ZENG, XIAOHAN CHEN, YONGMEI LI, MIN PENG, NING MA, WEIMING JIANG, CHUNLING YANG, AND MING LI ................................................................. 727
Abnormal rostrum in Polycheles typhlops Heller, 1862 (Decapoda: Polychelidae) from the central western Mediterranean
MARIA C. FOLLESA, RITA CANNAS, ALICE GASTONI, SERENELLA CABIDDU, ANNA M. DEIANA, AND ANGELO CAU ... 731

(contents continued on inside back cover)
Zuzalpheus Rios and Duffy, 2007: a junior synonym of Synalpheus Bate, 1888 (Decapoda: Alpheidae)

ARTHUR ANKER AND SAMMY DE GRAVE

TUDEGE

Minutes of The Crustacean Society Executive Committee Meeting San Antonio, Texas, January 3, 2008

Information for Contributors

Content.—The Journal of Crustacean Biology contains papers of broad interest dealing with any aspect of crustacean biology and notices of business transacted at meetings of the Crustacean Society. Papers will be published in English only, but abstracts or summaries in French, German, Portuguese or Spanish may be added when appropriate. Descriptions of single new species may be accepted only if they are accompanied by significant information on zoogeography, ecology, phylogenetic relationships, or other biological concerns.

Publication costs.—Authors are required to pay full costs of color figures, and changes made in proofs. Changes made in proof, with exceptions, are $5.00 each. Page charges are $75.00 per page, optional for society members, mandatory for nonmembers. The Journal of Crustacean Biology accepts papers for publication on the basis of merit. While authors will be asked to assume cost of page charges at the lowest rate possible, lack of funds for page charges will not prevent a paper being published, but authors who are not members of the society must pay all page charges.

Submission of manuscripts.—Manuscripts should be submitted at http://jcb.allentrack2.net.

Form of manuscripts.—For detailed instructions, see the web site at http://www.vims.edu/tcs/. The original of the manuscript must be typed double-spaced on one side of white paper, leaving margins of at least one inch. Use triple space above headings. Submit original and three facsimiles and retain an author’s copy. Number pages consecutively at the top right-hand corner. Italicize or underline scientific names of genera and species but make no other editorial indications.

The sequence of material should be: Running Head, Title, Author(s), Address(es), Abstract, Key words, Text, Acknowledgements, References, Appendix, Tables, List of Figures, Figures (each numbered and identified).

The title page should give the title of the paper, the author’s name, affiliation, and mailing address including postal code. In cases of multiple authorship, each author’s initials should be enclosed in parentheses before the mailing address. Each author’s e-mail address should be enclosed in parentheses and should follow the mailing address. Indicate the corresponding author. A running head or abbreviated title of not more than 52 characters should be placed on the upper part of the title page.

The abstract should not exceed one double-spaced page. It should contain a summary of significant findings and note the implications of those findings.

In the text, the Journal of Crustacean Biology follows the style of the Council of Biological Editors Style Manual 4th Ed. The Webster’s New Universal Unabridged Dictionary, 2nd ed., serves as authority for correct spelling and division of words. Metric units of measurement are preferable.

Tables and figures should be self-explanatory, not requiring reference to the text. Each table should start on a separate page. Headings and format should be consistent. Vertical rules should be avoided.

Halftone figures, printed on glossy paper, not photocopies, must be submitted with each review copy of the manuscript. Figures will be reduced to 176 mm or 84 mm in width and maximum height of 230 mm. Final figure files must be at a resolution of 600 d.p.i. for half-tone photos, or 1200 d.p.i. for line art in a TIFF format.

All papers referred to in the text should be listed alphabetically by the senior author’s surname under the heading “References.” Use only the author’s surname and initials in the References. Names of periodicals should be written out in full. (Sample citation: Smith, J. Q. 1981. The distribution of swimming-crabs. Journal of Crustacean Biology 1: 105-119.)

Proofs.—Galley proof will be sent to authors for correction and approval. Changes other than printer’s or editor’s errors will be charged to authors except to update entries listed as “in press.” Reprints, available by purchase only, may be ordered at the time proofs are returned. Art work will be returned only upon request.
