Multiple-entity based classification of airborne laser scanning data in urban areas
S. Xu, G. Vosselman and S. Oude Elberink .................................................. 1

A GHIS-based spectral preservation fusion method for remote sensing images using edge restored spectral modulation
X. Zhou, J. Liu, S. Liu, L. Cao, Q. Zhou and H. Huang .................................... 16

Automatic registration of optical imagery with 3D LiDAR data using statistical similarity
E.G. Parmehr, C.S. Fraser, C. Zhang and J. Leach ........................................... 28

Estimation of higher chlorophyll a concentrations using field spectral measurement and HJ-1A hyperspectral satellite data in Dianshan Lake, China

Detecting Sirex noctilio grey-attacked and lightning-struck pine trees using airborne hyperspectral data, random forest and support vector machines classifiers
E.M. Abdel-Rahman, O. Mutanga, E. Adam and R. Ismail .................................. 48

Identification of multi-scale corresponding object-set pairs between two polygon datasets with hierarchical co-clustering
Y. Huh, J. Kim, J. Lee, K. Yu and W. Shi ......................................................... 60

The potential of the greenness and radiation (GR) model to interpret 8-day gross primary production of vegetation
C. Wu, A. Gonsamo, F. Zhang and J.M. Chen ................................................. 69

Mapping the human footprint from satellite measurements in Japan
F. Yang, B. Matsushita, W. Yang and T. Fukushima ........................................... 80

Remotely sensed biomass over steep slopes: An evaluation among successional stands of the Atlantic Forest, Brazil
J.M. Barbosa, I. Melendez-Pastor, J. Navarro-Pedreño and M.D. Bitencourt .................. 91

Structured Sparse Method for Hyperspectral Unmixing
F. Zhu, Y. Wang, S. Xiang, B. Fan and C. Pan .................................................. 101

Automated parameterisation for multi-scale image segmentation on multiple layers
L. Drăguț, O. Csilák, C. Eisank and D. Tiede .................................................... 119

Indoor and outdoor depth imaging of leaves with time-of-flight and stereo vision sensors: Analysis and comparison
W. Kazmi, S. Foix, G. Alenyà and H.J. Andersen .............................................. 128

Application of multispectral LiDAR to automated virtual outcrop geology
P. Hartzell, C. Glennie, K. Biber and S. Khan .................................................... 147

Measuring deformations using SAR interferometry and GPS observables with geodetic accuracy: Application to Tokyo, Japan
T. ElGharbawi and M. Tamura ................................................................. 156

Aboveground total and green biomass of dryland shrub derived from terrestrial laser scanning
P.J. Olsoy, N.F. Glenn, P.E. Clark and D.R. Derryberry ..................................... 166

Detecting subcanopy invasive plant species in tropical rainforest by integrating optical and microwave (InSAR/PollInSAR) remote sensing data, and a decision tree algorithm
A. Ghulam, I. Porton and K. Freeman ......................................................... 174
