

Anexo 16. Catálogo fotográfico de las especies de corales del Caribe y Pacífico (ordenadas alfabéticamente). Todas las fotos tomadas por J. Garzón-Ferreira con excepción de *Diploria strigosa* (acercamiento), *Siderastrea radians* y *Solenastrea bournoni* por Sven Zea.

ESPECIES DEL CARIBE

Anexo 16. Continuación...

Acropora cervicornis

A. cervicornis

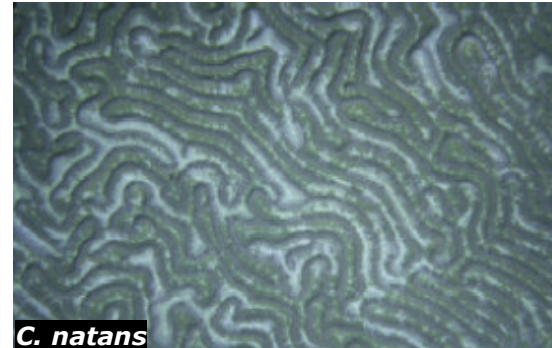

Acropora palmata

A. palmata

Colpophyllia natans

C. natans

Dendrogyra cylindrica

D. cylindrica

Dichocoenia stokesii

Anexo 16. Continuación...

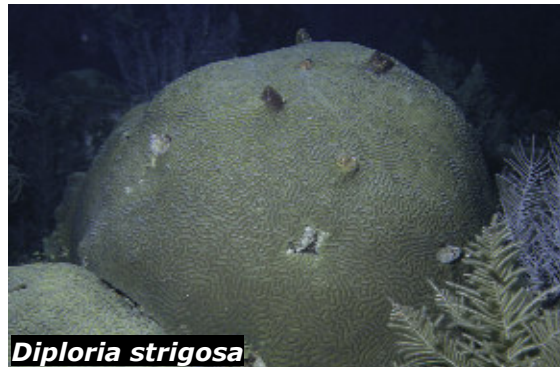

Diploria clivosa

Diploria labyrinthiformis

D. labyrinthiformis

Diploria strigosa

D. strigosa

Eusmilia fastigiata

Favia fragum

Isophyllia sinuosa

Isophyllastrea rigida

Anexo 16. Continuación...

Leptoseris cucullata

Madracis decactis

Madracis mirabilis

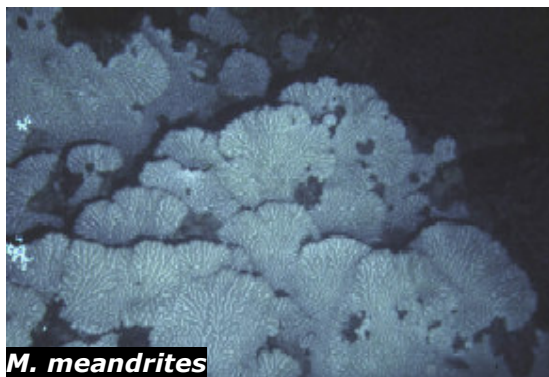

M. mirabilis

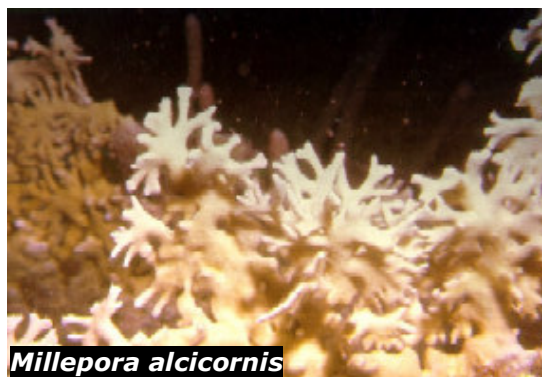

Madracis senaria

Meandrina meandrites

M. meandrites

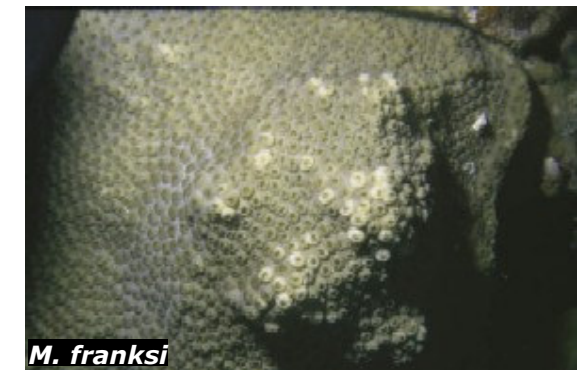

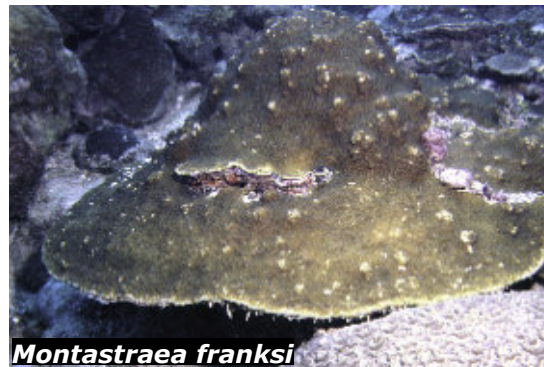

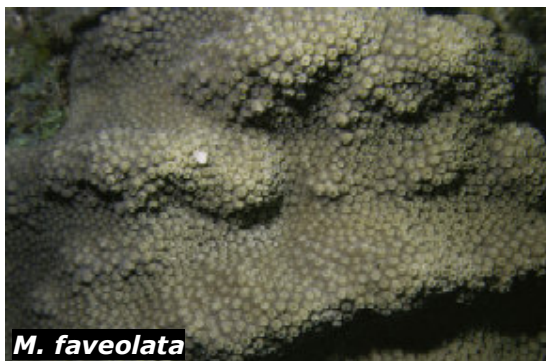

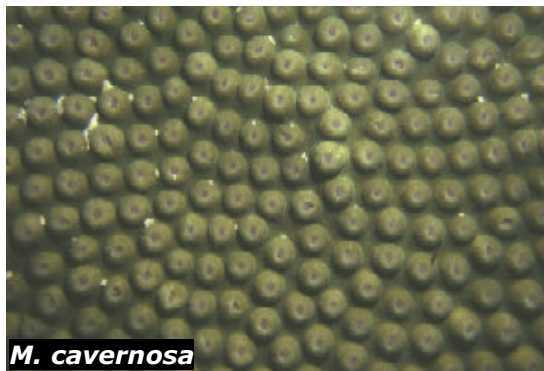

Millepora alcicornis

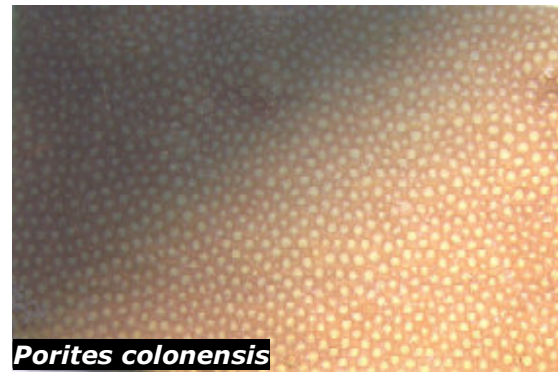

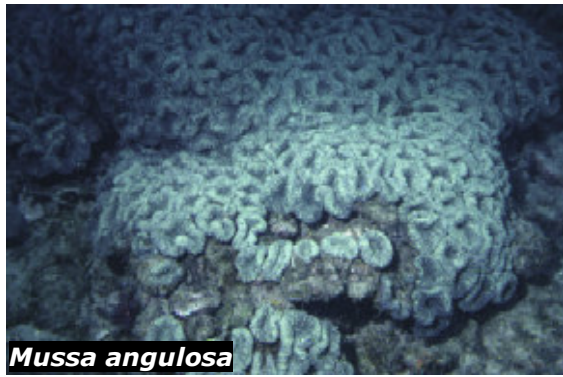

M. alcicornis

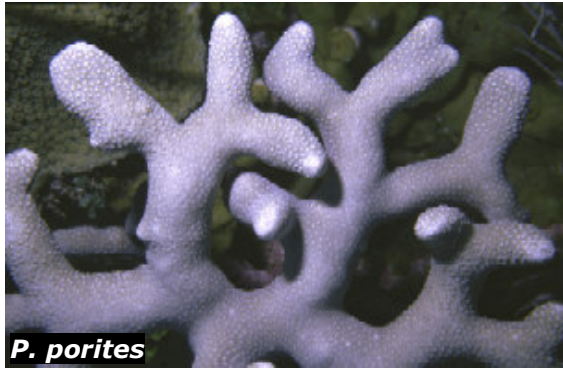

Anexo 16. Continuación...

Anexo 16. Continuación...

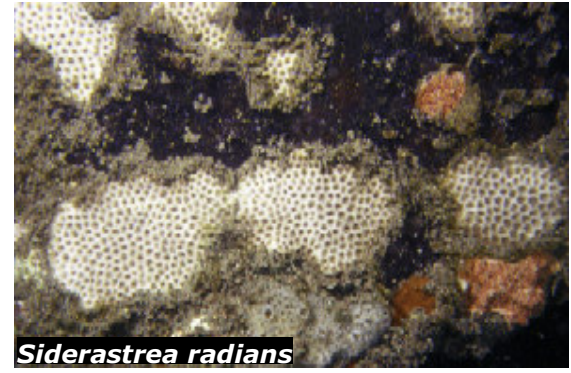

Anexo 16. Continuación...

P. porites

Scolymia lacera

Siderastrea radians

Siderastrea siderea

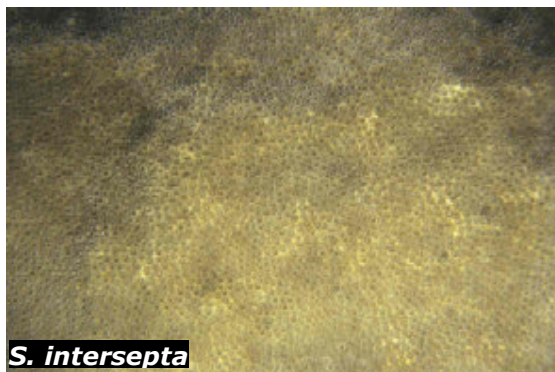

S. siderea

Solenastrea bournoni

Stephanocoenia intersepta

S. intersepta

Stephanocoenia michelinii

Anexo 16. Continuación...

Stylaster roseus

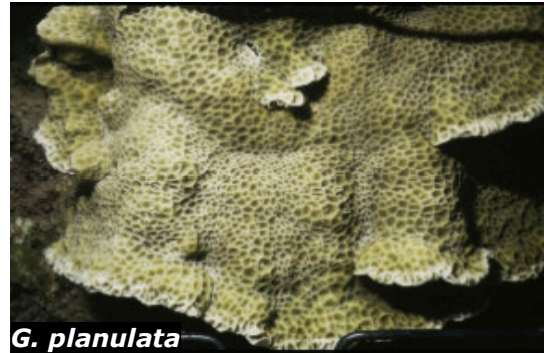

Tubastrea coccinea

Especie reportada para el Caribe y el Pacífico

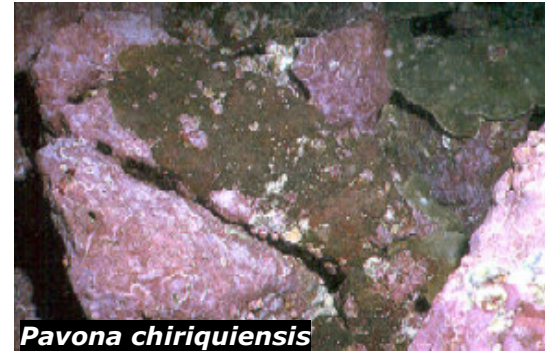

ESPECIES DEL PACÍFICO

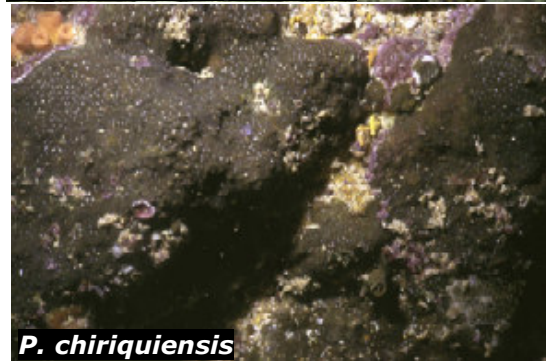

Gardineroseris planulata

G. planulata

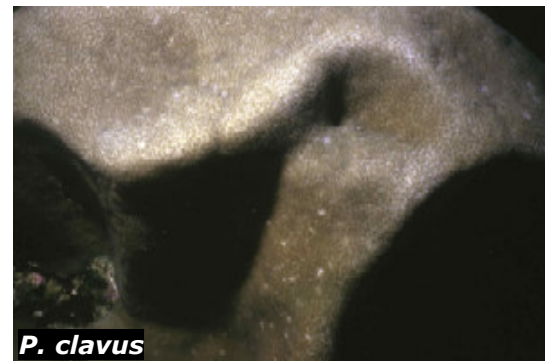

Pavona chiriquiensis

P. chiriquiensis

Pavona clavus

P. clavus

Anexo 16. Continuación...
