

# Status and Trends of Caribbean Coral Reefs: • 1970-2012 •

EDITED BY  
JEREMY JACKSON · MARY DONOVAN · KATIE CRAMER · VIVIAN LAM

# CONTENTS

INTRODUCTION .....	6
ACKNOWLEDGMENTS, CO-SPONSORS, AND SUPPORTERS OF GCRMN .....	8
EXECUTIVE SUMMARY .....	10
Introduction .....	10
Strategy and Scope of the Present Report .....	12
Patterns of Change from 1970 to 2012 .....	12
Drivers of Change .....	14
Too many people .....	14
Overfishing .....	14
Coastal pollution .....	15
Ocean warming .....	15
Invasive species .....	16
Concluding remarks .....	16
Implications for Management .....	17
PART I: OVERVIEW AND SYNTHESIS FOR THE WIDER CARIBBEAN REGION .....	18
1. Database, Methodology, and Analysis .....	21
1a. Scope of the Data .....	21
1b. Analysis .....	30
2. Overall Changes in Biological Abundance .....	31
2a. Patterns of Change for Corals and Macroalgae .....	31
Long-term changes in corals and macroalgae .....	33
Geographic Variation in Reef Degradation .....	34
Ordination of coral and macroalgal community composition: .....	40
2b. Ecological Extinction of Formerly Dominant Species .....	42
Decline of <i>Acropora palmata</i> and <i>A. cervicornis</i> .....	42
Decline of <i>Diadema antillarum</i> .....	44
Parrotfish abundance and biomass .....	44
3. Drivers of Coral Reef Degradation .....	44
3a. Human Population Density .....	45
3b. Fishing .....	47
<i>Diadema</i> abundance before 1984 as a proxy for historical fishing pressure .....	48
Contrasting fates of reefs since 1984 in relation to historical fishing pressure .....	49
The role of parrotfish today .....	50
Indirect effects of fishing due to increased macroalgal abundance .....	51
Reduction in coral recruitment .....	51
Increases in coral disease .....	52
Indirect effects of fishing in relation to the effects of hurricanes .....	54
3c. Coastal Pollution .....	56
3d. Ocean Warming .....	61
3e. Invasive Species .....	63
4. Synthesis .....	65
4a. Patterns of Change .....	65
Timing and rates of reef degradation .....	65

Phase shifts .....	65
Geographic variation in reef decline .....	66
<b>4b. DRIVERS OF CORAL REEF DECLINE .....</b>	<b>66</b>
Too many people .....	66
Overfishing .....	66
Coastal pollution .....	67
Global climate change .....	68
Invasive species .....	68
Concluding remarks .....	69
<b>5. Recommendations for Management .....</b>	<b>69</b>
1. Ban all trap fishing, spearfishing and any other fishing of parrotfish in coral reefs and adjacent environments .....	70
2. Simplify and standardize monitoring of Caribbean reefs and make results freely available in real time to promote adaptive management .....	70
3. Foster communication and exchange of information .....	70
<b>6. References .....</b>	<b>71</b>
<b>7. Appendices .....</b>	<b>78</b>
Appendix I – Data template .....	78
Appendix II – Timelines of coral cover and composition at 40 reef sites .....	79
Appendix III – Sources of qualitative data for <i>Acropora</i> decline .....	99
Appendix IV – Sources of data for <i>Diadema</i> abundance before 1984 in Table 5 .....	109
<b>8. List of Acronyms .....</b>	<b>111</b>

## PART II: REPORTS FOR INDIVIDUAL COUNTRIES AND TERRITORIES

<b>1. Introduction .....</b>	<b>112</b>
<b>2. Countries, States, and Territories .....</b>	<b>115</b>
Antigua & Barbuda .....	116
Bahamas .....	118
Barbados .....	123
Belize .....	127
Bermuda .....	132
Bonaire .....	136
British Virgin Islands .....	140
Cayman Islands .....	143
Colombia .....	147
Costa Rica .....	152
Cuba .....	155
Curacao .....	159
Dominican Republic .....	164
Dominica .....	168
Florida Keys .....	170
Flower Garden Banks .....	176
French Antilles .....	180
Grenada .....	184
Guatemala .....	187
Honduras .....	190
Jamaica .....	193
Mexico .....	198
Navassa Island .....	204
Nicaragua .....	206
Panama .....	208
Puerto Rico .....	212
Saba, St. Maarten, and St. Eustatius .....	216

---

St. Kitts & Nevis .....	218
St. Lucia .....	220
St. Vincent & the Grenadines .....	224
Trinidad & Tobago.....	226
Turks & Caicos .....	229
US Virgin Islands .....	231
Venezuela .....	238
